

Dana Dolly "Rental Kit"

The **Dana Dolly** is an affordable camera dolly system that can go with you virtually anywhere. Designed by a key grip with over 20 years' experience in all types of production, it is both simple and practical. The Dana Dolly is easy to set up, it can be used with a variety of track options, and can be supported using standard junior stands, apple boxes, or the ground, whatever the shot requires. A popular choice is using the Matthews Low Boy Combo stand as this stand can be used with "combo adapter wheels" so you can roll the dolly into place when the terrain permits. The dolly itself has a Mitchell Mount that can take all types of camera heads, and this kit includes bowl adapters for 75mm, 100mm and 150mm heads. The sixteen-wheel design with floating trucks provides a smooth glide. The track ends and center support can use any 1 1/4" pipe as a track: aluminum, stainless steel, etc. So if you're on location and don't want to pack track, you can stop by a homecenter and pick up some pipe or conduit as an alternative to the Schedule 80 aluminum pipe the manufacturer recommends for everyday use.

Features:

- Fast and Portable Dolly System
- Aluminum Construction
- Black Industrial Finish to Minimize Reflection
- Soft Polyurethane Wheels
- ABEC-7 Precision Bearings
- Wheels Machined Round to 6000/inch
- Made in the USA

Kit Includes:

- Dana Dolly
- 2-Track End Brackets
- Center support bar
- Monitor adapter with ball head
- 75mm, 100mm and 150mm bowl adapters
- Multi-tool
- Custom wheeled SKB Case

Please Note: When using tripod heads with long tie-down stems, such as those on Manfrotto models, you will have clearance issues with the center support if you are using the stock handle. The Manfrotto 504 and Manfrotto 509 heads can be successfully used with the Dana Dolly if you use the Manfrotto Short Handle.
